-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Jul 10, 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5, 12-14, 50, 52, 56, 57, 64, 65, 73, 74, 82, 84, 86, 88-91, and is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 56, 57, 64, and 65 is/are allowed.
- 6) ☒ Claim(s) 1-5, 12-14, 50, 52, 73, 74, 82, 84, 86, 88-91, and 102-117 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some* c) ☐ None of:
- 1) ☒ Certified copies of the priority documents have been received.
 - 2) ☐ Certified copies of the priority documents have been received in Application No. _____.
 - 3) ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- *See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 12-14, 50, 52, 73, 74, 82, 84, 86, 88-91 and 102-117 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abo et al in view of Ishida.

Claims 1, 12, 82 and 84: Abo discloses an information processing apparatus (20) embodying a program of instructions adapted to exchange information with a second information processing apparatus (10, see FIG 1) comprising

input device means for capturing information (25, col 3 lines 59-67), inherently comprising memory means for storing the captured information,

acquisition circuit means (23) for acquiring data associated with said captured information (col 3 lines 49-58), on the basis of said information, and

display means (24) for displaying the acquired data (col 4 lines 5-19, col 1 lines 47-67).

Abo fails to disclose time information.

Art Unit: 2682

Ishida discloses a means for exchanging information with another device (FIG 1) wherein information may be captured including time information (col 4 lines 40-59, col 5 lines 24-36).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to add such a feature to Abo, as it would allow a brief memorandum to be added with the captured information as suggested by Ishida, an advantage over the invention of Abo.

Claim 2: Abo discloses applicant's invention of claim 1 as set forth above, and further discloses means to transmit information and receive the acquired data (e.g. map data) from the other communication device (col lines), but fails to disclose that the transmitted information is the captured information, that is, that the acquired data is received in response to the transmission of the captured data.

However, it would have been obvious to one of ordinary skill in the art at the time of the invention to add such a step to Abo, as such would have reduced the amount of acquired data needed to be sent. In the case of Abo, a large amount of data is needed to be sent because Abo discloses that the acquired data is sent en masse to the mobile unit before the location is determined. By sending only the e.g. map data which is needed (i.e. only that which immediately surrounds the mobile), less data needs to be sent to the mobile and bandwidth is saved, as well as storage space.

Claims 3 and 14: Abo discloses that the acquired information is stored in a database (21).

Art Unit: 2682

Claims 4 and 73: the inventions of claims 4 and 73 are the method inherently performed by the apparatus invention of claims 1 and 12, and as such is rejected using the same reasoning as set forth above.

Claim 5: while Abo discloses a transmission medium and a controller 23 inherently using a program, but fails to disclose that the program may be sent via the medium, such was notoriously well known in the art at the time of the invention, and as such Official Notice of such a feature is taken. It would have been obvious to one of ordinary skill in the art at the time of the invention to allow the mobile to be programmable, as such allows the mobile software to be updated without needing to bring the mobile into a physical location.

Claims 13, 86, 88 and 90: please see the rejection of claim 2 above.

Claims 50 and 52: Abo discloses that the radio connection is a telephone (reads cellular) connection (col 8 lines 3-5).

Claim 74: the use of a floppy disk would have been an obvious choice for the database 21, as such is portable.

Claims 89 and 91: Abo discloses that the radio connection is a telephone (reads cellular) connection (col 8 lines 3-5).

Claims 102 and 108: Abo discloses that the user initiates the capture, which would inherently use a button. **Claims 103 and 109:** since Abo in view of Ishida discloses a memory, which may be used to store any data, such would inherently include music and other kinds of data. **Claims 104 and 110:** Abo discloses a cellular phone, which includes a microphone. **Claims 105-**

Art Unit: 2682

107 and 111-113: the use of a common hiding circuit would have been an obvious addition to one of ordinary skill in the art at the time of the invention since such would provide more security for said captured information. **Claims 114-117:** Abo discloses that the other device may be a network device, which would inherently include a computer/database.

Allowable Subject Matter

3. Claims 56, 57, 64 and 65 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter:

Claims 56, 57, 64 and 65 all teach towards an information processing apparatus comprising means for capturing and storing information, means for acquiring data associated with said captured information on the basis of said information, and means for displaying the acquired data, wherein the data includes a song title, a singer's name, a composer's name, a songwriter's name or a genre.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2682

Conclusion

6. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for formal communications intended for entry)

Or:

(703) 872-9314 (for informal or draft communications, please label "PROPOSED"
or "DRAFT")

Hand delivered responses should be brought to Crystal Park II, 2121 Crystal
Drive, Arlington VA, sixth floor (receptionist).

7. Any inquiry concerning this communication or earlier communications from the examiner
should be directed to Charles Craver whose telephone number is (703) 305-3965.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,
Vivian Chin, can be reached on (703) 308-6739.

Any inquiry of a general nature or relating to the status of this application or proceeding
should be directed to the Group receptionist whose telephone number is (703) 305-4700.
